

DFI conducted a mission to support Government of Uganda in finalizing a monitoring framework for its Partnership Policy covering aid and beyond aid issues, as well as a memorandum of understanding for GoU and its development partners to sign. The mission conducted a successful workshop in which GoU and DPs discussed the draft framework and principles for the MoU, as well as extensive briefing of officials in the Ministry of Finance, which will be responsible for the detailed monitoring of the policy. The next steps will be full training sessions on the policy, followed by a baseline survey of DP and GoU performance, and agreement on future targets.
