

UNESCO have commissioned DFI to deepen the Government Spending Watch analysis of education spending by disaggregating it by level (pre-primary, primary, secondary, tertiary), type (capital, wages and non-wage recurrent) and funding source (government revenue and donors) for approximately 50 countries. The database and an analytical report will form a background paper for the 2014 Education for All Global Monitoring Report and be available thereafter on the GSW site as a public good.
